Experience

Adventure Code *Jun 2023 – Nov 2025*
Web Developer (Full Stack) *Guwahati*

- Built scalable full-stack apps with **React.js**, **Node.js** and **MySQL/MongoDB**; designed and optimized **RESTful APIs** for faster response times.
- Implemented secure **JWT** authentication and a modular backend architecture for maintainability.
- Improved application responsiveness using debouncing, lazy loading, and code-splitting
- Contributed to feature development, testing, and deployment based on project requirements.

EKODUS Technologies Pvt Ltd *Mar 2022 – Apr 2023*
Frontend Developer *Guwahati*

- Built responsive, reusable UI components in **React.js** and improved cross-browser compatibility.
- Supported **CI/CD** pipeline setup using Jenkins to improve deployment efficiency.

Projects

ResumeSync – AI Resume Optimization SaaS
React.js, Node.js, MongoDB, JWT, Gemini API *GitHub*

- Built and deployed a full-stack SaaS using the **Gemini API** to analyze resumes against job descriptions and suggest relevant keyword and content improvements.
- Implemented **LLM model fallback strategies** to handle token-limit constraints, secured resume data with **JWT and HttpOnly cookies**, and automated PDF generation.

Vision-Based PC Automation
Python, OpenCV, MediaPipe, PyAutoGUI *Github*

- Built a gesture-controlled system that maps real-time **hand landmark detection** to system-level controls, enabling touchless PC navigation with no extra hardware.
- Achieved low-latency tracking under varying lighting and reduced cursor jitter for smooth control.

Speech to Action System
Python, Speech Recognition, NLP, Text-to-Speech *Github*

- Built a **voice assistant** that converts spoken commands into actions: web search, app launch, navigation and system commands.

Telco Customer Churn Prediction
Python, Pandas, Scikit-learn, Power BI *GitHub*

- Developed ML models to identify customers at risk of churn and built Power BI dashboards to visualize churn patterns and key contributing factors.
